

Webcast Satellite Venue Requirements

1.

HAVE A CHURCH OR VENUE FOR THE WEBCAST

To become a satellite venue for the *Revival Conference in Atlanta, Georgia (October 21st-23rd)* you will need to have a **church or venue to host it in for the 3 days**. You will simply be re-broadcasting the web-stream of the conference “live” in real-time and be gathering in your area. Any location in North America will work for this and it is a great opportunity to reach out locally for people to hear messages on revival.

2.

ENSURE INTERNET AND VIDEO SETUP

You will need to confirm that you have a **high speed internet access** that can support viewing video over the internet and also a **video projector setup** so you can show the fullscreen video on a larger viewing area. Even a large screen TV will work if you can connect the computer screen to it as a viewing screen. The best solution is to have a digital projector to project the computer screen on the wall.

3.

GET APPROVED AS A OFFICIAL VENUE

Once you have confirmed the first 2 steps. And you want to commit to go ahead and be a official satellite venue for the conference you can email us at: sermonindex@gmail.com with: your church or venue name, city, state (province), and phone number and email. **You will then be listed as a “satellite” viewing venue.** Worship times will be followed along mostly with the webcast so we ask venues not cover these areas themselves. And there must be no charge for the event at all.

4.

PRINT MATERIALS AND SPREAD THE WORD LOCALLY

You will be emailed **printable materials** to print for your venue and attendees. *It is encouraged to get the word out locally* and see many come from different churches to watch the event live.
